MACHINERY IS PURCHASED FOR SANGER SHAFT

The Sanger property at Argente is to be equipped with a 40 horse power engine, Rand-Ingersoll compressor, Jack-hammer, drills and other needed equipment, which will permit of the scope of operations being enlarged at an early date. The machinery was purchased last Saturday. W. A. Sanger, representative of the North Divide Mining company, has been purchased, and removal of equipment will be made within the next few days.

With installation of machinery the shaft on the Sanger property, now having a depth of 100 feet, will be given another lift of at least 100 feet, with a possibility of 200 feet, before drifting is started. However, the drifts on the 100 level will be continued without interruption with a view of opening ore reserves which will insure steady shipments being maintained with the advent of next spring.

Frank Taylor, who is in charge of development at the Sanger property, stated Sunday while in Tonopah, that the physical conditions of the mine was better than at any time since the inception of operations. In the drifts from the 100 level large veins of high grade ore are in evidence, and it is quite evident that the property long ago passed the prospect stage.

Argente as a coming district is forcing steadily to the front. Prospectors are busily engaged in developing their properties, while over at the Ecklund property there is a boom of activity with highly satisfactory results taking place. The Ecklund property has been equipped with a plant of machinery and the 50-foot shaft is to be lowered to a depth of 200 feet before any drifting or cross-cutting is attempted. This work will be completed by spring, and there is every reason to believe that the holdings will at that time be entered among the list of substantial shippers.

RUSSIA HAS MILLIONS IN ITS EMPLOY

MOSCOW, Dec. 14.—There are 7,000,000 on the Russian government's civil payroll, says a report just made by Yurey Larn, the former Social Revolutionary leader and chairman of a committee selected by the Central government to reduce the number of institutions supported by the government and to eliminate unnecessary bureaus.

Karl Radek, Bolshevik leader, stated in a recent article that the strength of the Soviet army is 5,000,000 men. The size of the navy is not known.

Granting that the figures of Radek and Larn are correct the Bolshevik government has at least 12,000,000 persons on its civil and military payrolls, or one person out of every ten in what constitutes Soviet Russia.

In the civil list 2,970,000 persons are engaged in industries, according to Lenin's statement and 1,500,000 are in transport service. The employees in government offices and institutions number 2,100,000. Timber work and farm work under government control employ 400,000.

WHEAT YIELD OF FRANCE NOW RANKS SECOND

WINNIPEG, Man., Dec. 14.—France ranks second among the wheat producing nations of the world, according to figures compiled by the International Institute of Agriculture here. The United States is first, Canada is third.

The report states that this year's harvest is the third France has grown since the armistice and notes that nothing could tell more eloquently than this great harvest of the rehabilitation of the sturdy French nation and its recovery from the desolation of war.

Call Mrs. Sylvia Grochong, phone 806, when you need music for dances or parties. The Grochong orchestra is composed of real musical artists.

IMPROVEMENT INDICATED IN GUARD FORCES

WASHINGTON, Dec. 14.—Rapid progress in the rebuilding of the national guard—was made during the last fiscal year, says the annual report today of the chief of the militia bureau, under signature of Brigadier-General Jesse M. Carter, retired. On last June 30, the report says, the guard numbered 113,630 with 331 organizations allotted, but not yet organized.

On the basis of expansion during last year, General Carter estimated that before the end of the current fiscal year the guard would number 160,000 men, or some 10,000 more than in the regular army. Pointing out that available funds for this year provide for only 122,000 men, the report says that unless increased appropriations are allowed "there will be trouble ahead" for the militia bureau.

FEWER JAPS ARRIVE DURING THE LAST YEAR

WASHINGTON, Dec. 14.—The tide of immigration which was approaching a flood when the restriction law went into effect brought 895,228 aliens into the United States in the fiscal year ended last June 30, according to the annual report today of Secretary Davis of the Department of Labor. This number compared with 430,901 in the previous fiscal year and in more than twice the estimate of 250,000 which Mr. Davis makes for this fiscal year under the operation of the restriction act.

More than one-fourth of the aliens admitted last year were Italians, the number being 222,269 as compared with 95,145 in the fiscal year of 1920. Numbered by race, apart from nationality, the report says, the Jews arriving numbered 119,936. Chinese admitted numbered 4,017, an increase over the preceding year, but the admissions of Japanese decreased from 12,568 in 1920 to 10,675 in 1921. In Hawaii the Japanese arrivals showed a slight increase, with a total of 2,599.

STONES WILL MARK ADVANCE OF GERMANS

PARIS, Dec. 14.—Among the ceremonies to celebrate Armistice Day in France was the inauguration of the first of the commemorative boundary stones which the Touring Club of France is going to place at the points on all roads of France where they cross the line of the battle front of 1918.

These stones are in the form of a four-sided truncated pyramid with a polli's helmet on top, crowned with laurels. On the sides are grenades from which more laurels spring, and the principal side facing the road bears the inscription, in French, "Here the invader was driven back, 1918."

This first commemorative stone was inaugurated at Chateau-Thierry, by a representative of the Minister of War, in the presence of the military attaches of all Allied countries.

BIG SUM IS GIVEN JAPS ON DISCHARGE

OSAKA, Japan, Dec. 14.—The greatest unemployment allowance ever granted to laborers in the history of Japan has just been given to 31 employees of the Asahi Glass company. This company has been discharging its employees gradually since last spring owing to the dullness of the glass market. Thirty-one of the most skilled and industrious workers survived the storms until this last week when they were also let out. They were given a discharge allowance of ¥ 34,226 (\$17,113) to be divided among the 31 men.

REWARD

Will pay \$250 for the arrest and conviction of one or all the parties who broke into the shaft house of the Apex Mines company and took a 30 h. p. motor and starting box. Will pay a further reward of \$100 for the return of the motor and starting box. A further reward of \$100 will be paid for information leading to the arrest and conviction of one or all the guilty parties.

Burglars Don't Seek the Light!

Darkness is their stock in trade. They work by stealth—unheard and unseen—their movements cloaked in secrecy. It's honest folks that see the light. They are the only ones who can risk it.

It's the same way in business. The merchant who is not sure of his goods does not dare to advertise. Advertising would hasten the end of his business career—put him to a test he could not meet.

The merchant who advertises deliberately invites your inspection. He tells you about his product and then lets it stand on its own merits. You can depend on him. He knows his product is good.

That's one reason why it pays you to read the advertisements in THE BONANZA. It is through advertising that you are able to keep in touch with the good things that progressive business houses are spending their money to introduce and keep before you.

Advertisements are interesting, instructive and profitable. They throw a powerful light on the very things that concern you most. READ THEM!
